Current Issues in Convention and Exhibition Facility Development Robert R. Nelson 2013-04-15 Increase tourism in your community by designing and expanding your local convention and exposition services! This book provides you with solutions to the issues that can arise during the planning and production phases of constructing a facility as part of a community's tourism infrastructure. In Current Issues in Convention and Exhibition Facility Development, you'll find diverse perspectives from experts in a range of disciplines—including public policy, tourism, convention management, and urban planning. As more communities attempt to gain a share of the economically important meetings and exhibition market, this critical resource will aid university faculty, state and city government officials, and convention and visitors' bureaus. Current Issues in Convention and Exhibition Facility Development examines the reasons why certain communities should create convention, event, or tourism centers. The strategies and tips presented in this book can help you select the most appropriate course of action for any given community, from locating the best area to build a center, to allocating space for an exhibition center in an already existing public building. This extensive guide addresses the political, economical, and environmental concerns that can prevent a convention center from ever leaving the drawing board. This book offers you practical advice on a number of concepts, including: linear planning in the first phase—ten questions communities must confront Dedicated Convention Centers (DCC)—the “mother lode” of convention/exhibit tourism capitalizing on the union of two industries—conventions and casinos the definition of “success” in the lifetime of a convention center capturing a share of the market without interfering with local venues the facts behind the illusions—investigating the empirical evidence behind the central myths of the convention and tradeshow industry Current Issues in Convention and Exhibition Facility Development is generously enhanced with figures, tables, models, and case studies to illuminate the facts you need to know to stay competitive.

Second Promised Land Harry H. Hiller 2009-05-01 Combining statistical analysis and ethnographic study, Harry Hiller uncovers two waves of in-migration to Alberta. His innovative approach begins with the individual migrant and analyzes the relocation experience from origin to destination. Through interviews with hundreds of migrants, Hiller shows that migration is complex and dynamic, shaped not just by what Alberta offers but also prompted by a process that begins in the region of origin which makes migration possible, and helps determine whether migrants stay or return home. By combining a social psychological approach with structural factors such as Alberta's transition from a regional hinterland province to its emerging role in the global system, discussions of gender, the internet, and folk culture, Second Promised Land provides a multi-dimensional and deeply human account of a contemporary Canadian phenomenon.
